<b>8. CCR Title:</b> Purify 2002 does not work in solaris 8 machines after the installation of 02/02 solaris OS patch. Install the proto version on Solara for testing.

<b>23. Problem: (use additional Sheets if necessary)</b> As per NCR ECSed33929, purify does not work on solaris 8 machines after installation of the 02/02 Solaris OS patch. However, for NCR 33281 purify was needed ASAP. The version the vendor refers to in the TT attached in 33929 is a proto version, and we do not know when a general release version of this product with the appropriate bug fix will be available.						
<b>24. Proposed Solution: (use additional sheets if necessary)</b> Install the proto version of the bug fix on the machine "solara", LOCALLY! The tar file NewPurify.tar is in the CM inbox on the machine "lemmings"; cksum output: 3202046105      85975552      NewPurify.tar						
<b>25. Alternate Solution: (use additional sheets if necessary)</b> None						
<b>26. Consequences if Change(s) are not approved: (use additional sheets if necessary)</b> Emergency NCR not solved. Also, purify is essential when we encounter other memory corruption problems.						
<b>27. Justification for Emergency (If Block 15 is "Emergency"):</b> Purify, which hitherto worked, does not work now. It is essential when we have memory corruption issues. Right now, relb is broken in stdio libs, and we need purify ASAP.
